RL Project Schedule

	Date	Focus Areas	Marks Distribution
Title Confirmation	5th Sept	-	-
Review-1	18th Sept	Motivation, Objective, Literature Review, Problem Statement	10
Review-2	23rd Oct	Model Architecture/Methodology, Experimental Setup-Data Collection, EDA, Preprocessing, Feature Extraction	30
Review-3	13thNov	Model Building & Training, Model Evaluation, Result & Discussion, Future Work, Conclusion.	40
Final Project Submission	16thNov	Final Project Formatted Document need to be submitted. (Strictly follow the template)	20

Project Guidelines for Data Mining Project

1. Team Formation

- **Group Size:**
  - Maximum: 3 members
- **Team Registration:**
  - Each team must register their group and project title by **5th September 2026**.
  - Submit the team details (names, roll numbers, and project title) through this link: **https://forms.gle/DCzEeXfqS91QYJdt9**

2. Project Requirements

- **Literature Review:**
  - Conduct a thorough review of existing research papers, articles, and resources related to your topic.
  - Cite all references properly using the recommended citation style (e.g., APA, IEEE).
- **Methodology:**
  - Clearly define the problem statement and propose a solution.
  - Provide a detailed explanation of the model architecture, algorithms, and tools used.
- **Implementation:**
  - Develop and implement the proposed solution.
  - Use appropriate datasets and tools for experimentation.
- **Evaluation:**
  - Evaluate the model using relevant metrics.
  - Discuss the results and compare them with existing approaches.
- **Documentation:**

    - Prepare a well-structured project report following the provided template.
    - Include all sections: Introduction, Literature Review, Methodology, Results, Discussion, Conclusion, and References.

3. Evaluation Criteria

The project will be evaluated based on the following criteria:

- **Technical Depth:** Complexity and relevance of the problem statement and solution.
- **Implementation:** Quality of code, model, and experimentation.
- **Documentation:** Clarity, structure, and completeness of the project report.
- **Presentation:** Communication skills, clarity, and confidence during reviews.
- **Timeliness:** Adherence to deadlines for all deliverables.

4. Important Notes

- **Plagiarism Policy:**
    - Plagiarism in any form (code, content, or ideas) will result in strict disciplinary action, including a **zero mark** for the project.
    - Ensure all sources are properly cited.
- **Group Contribution:**
    - All team members must contribute equally to the project.
    - A peer evaluation form will be provided at the end of the project to assess individual contributions.
- **Late Submission:**
    - Late submissions will not be accepted unless prior approval is granted due to exceptional circumstances.
- **Communication:**
    - Regularly check emails and announcements for updates or changes to the schedule.

5. Tools and Resources

- **Programming Languages:** Python, MATLAB, or any other language suitable for your project.
- **Libraries/Frameworks:** TensorFlow, PyTorch, Scikit-learn, NLTK, etc.
- **Datasets:** Use publicly available datasets (e.g., Kaggle, UCI Machine Learning Repository).
- **Documentation Tools:** Microsoft Word, LaTeX, or any tool for report preparation.

6. Final Submission Format

- **Report Format:**
    - Follow the provided template strictly.
    - Include a title page, table of contents, and proper headings for each section.
- **Code Submission:**
    - Submit all code files in a compressed folder (ZIP or RAR format).
    - Include a README file with instructions to run the code.
